EDUCATION

B.Tech in Computer Science (AI & ML)

Marwadi University, Rajkot
2024 – 2028
CGPA: 9.3 / 10 (Current)

TECHNICAL SKILLS

Languages

Python, SQL

Libraries / Frameworks

Scikit-learn, Pandas, NumPy

Web & Tools

HTML, CSS, JavaScript
Git, GitHub, VS Code

Cloud

Google Cloud (Basics), AWS (Basics)

Other

Prompt Engineering, RAG
Jupyter Notebook

LANGUAGES

- English
- Hindi
- Gujarati

PULIND GADHIA

AI & ML Engineer | Generative AI Developer
Google Student Ambassador

ABOUT ME

I am an AI & ML Engineering student who loves building useful and smart solutions. I enjoy working on real-world projects using Python, Machine Learning, and Cloud technologies. I am a curious learner, a problem solver, and someone who likes to keep improving every day.

EXPERIENCE

- Google Student Ambassador** 2026 – Present
Google Developers / Student Program
 - Represent Google developer programs on campus.
 - Organize technical events, workshops, and study sessions.
 - Help students learn Google technologies and grow in their developer journey.
- AI & ML Project Developer** 2025 – Present
Marwadi University
 - Build AI/ML based projects and intelligent applications.
 - Work with LLMs and modern AI tools to create real-world solutions.
 - Use Git & GitHub for version control and collaboration.
 - Optimize models and code for better performance.
- Google Cloud Arcade & Skill Boost Participant** 2025 – Present
Google Cloud
 - Completed hands-on labs on cloud networking, compute, storage and AI.
 - Worked with Vertex AI, BigQuery, HA VPN, Compute Engine and more.
 - Gained practical knowledge of Google Cloud services.

PROJECTS

- | | | |
|--|---|--|
| | Qyverion
Audio Synchronization Software
Developed a desktop application to synchronize audio playback across multiple Bluetooth devices. Implemented low-latency sync algorithms and improved stability. | Tech Stack
Python, PyQt, PortAudio |
| | Quantum-Ready Cybersecurity System
Cybersecurity Project
Built a cybersecurity framework with strong encryption techniques. Focused on quantum-resistant ideas and secure communication. | Tech Stack
Python, Cryptography |
| | AI Voice Detector
Machine Learning Project
Built a system that detects whether the given voice is AI generated or real. Used ML models and audio features for accurate prediction. | Tech Stack
Python, Librosa, Scikit-learn |
| | CiviX
Civic Issue Reporting Platform
A platform where users can report civic problems like road issues, cleanliness, water supply etc. Helps in better communication between citizens and authorities. | Tech Stack
Python, Flask, MySQL, HTML, CSS, JavaScript |

CERTIFICATIONS

- Google Cloud Arcade & Skill Boost
- AWS Cloud Fundamentals
- Oracle Cloud Infrastructure Foundations
- Machine Learning Fundamentals
- Python Programming
- Google AI Learning Modules
- Microsoft Learn – AI & ML Modules
